Thus I same to the conclusion that the designer of a new	
Thus, I came to the conclusion that the designer of a new system must not only be the implementer and first large—	
scale user; the designer should also write the first user man- ual.	
The separation of any of these four components would have hurt T _F X significantly. If I had not participated fully in all	
these activities, literally hundreds of improvements would	
never have been made, because I would never have thought of them or perceived why they were important.	
But a system cannot be successful if it is too strongly influenced by a single person. Once the initial design is complete	
and fairly robust, the real test begins as people with many	
different viewpoints undertake their own experiments.
